INTRODUCTICTION

I dream in code since I had my first PC. I was always interested in how every app is working and how it is made. I love to explore code on GitHub and learn new skills. It's a great feeling when you have made something, others are using it and it makes their everyday life easier.

I started coding as my hobby. In time it grew to be my obsession, it became fun. I worked as a freelance web designer and developer, coding themes and plugins for Wordpress and e107 CMS. I have made great friendships all over the world and those friends continue to be my greatest support and inspiration until now.

How I grew as developer ?

I started from the web and learned my skills fast from HTML, CSS to Javascript and PHP.

With the spread of smartphones I started working on Android applications learning Java and Kotlin. I worked on native and hybrid Android applications using Javascript Angular and Ionic framework.

Why Javascript ?

Difference between mobile, web and desktop applications is starting to fade out. Javascript together with NodeJS is powerful tool which helps me to code for any platform and produce great results with one code base.

How I see the future ?

Currently my tool of choice is Angular framework but tomorrow it could be Flutter which I'm already learning and exploring. AI is becoming a great tool for developers. Future is coming fast, it is as interesting as it is unknown so I better get ready for it.

EXPERIENCE

WeOwn AG, Munchen, Germany, Sarajevo office (full time) — *Frontend Tech Lead*

2019 - NOW

Frontend tech lead on developing WeOwn applications:

WeOwn website – https://weown.com

Fintech applications

WeOwn business platform – https://business.weown.com
WeOwn investor investor platform – https://investor.weown.com
Money Turtle fintech PWA – https://turtle.weown.com

Administration applications

WeOwn console web app – https://console.weown.com
WeOwn market operator web app –
https://market-oprator.weown.com

Translation management

WeOwn localization app – https://localization.weown.com

Blockchain applications

WeOwn blockchain explorer – https://explorer.weown.com
WeOwn blockchain wallet – https://wallet.weown.com

Projects for Definity

Administration Interface – https://admin.definity.network
Clarity – https://clarity.definity.network
Clarity Absolute – https://clarityabsolute.definity.network

Projects for Roarington

Roarington is the virtual ecosystem of classic cars, where automotive cultural assets from the 20th century find a second digital life in the 21st century. Join the petrol head's community and access virtual showrooms, latest news, and get a digital twin of your classic car. In this project I used wide range of different technologies like: SSR, Pixel Streaming (ArcWare – Unreal Engine) and Video Streaming.

Findustrial GmbH, Schörfling am Attersee, Austria, remote (part time) — Frontend Tech Lead

2019 - 2021

Frontend tech lead on developing Findustral's pay-per use fintech platform.

Findustrial website – www.findustrial.io
Findustrial platform – https://app.findustrial.io

Freelance, Sarajevo — *Frontend Developer, Android Developer*

2015 - 2019

Coding Angular web apps, working on my own ideas and helping friends on their own projects.

Working with Angular framework since Angular 2 and I have experience with:

- Angular design patterns
- RXJS, Observables, operators ...
- REDUX state management in Angular applications using NGRX
- Hybrid mobile applications using Ionic Framework and Angular
- Building reusable code and libraries for future use in

  Angular applications
- Publishing and maintaining packages on NPM
  https://www.npmjs.com/~skadizz
- Writing extensive documentation

  https://github.com/SKaDiZZ/angular2-presta

Virtuooza.com — *Frontend Developer, Blogger*

2017 - 2019

Virtuooza.com development blog is my personal project. All I know, I learned online watching and reading tutorials. People spend their valuable time writing quality content and sharing their knowledge with others. I decided to do the same for the next generation of developers, share my knowledge and experience by providing quality tutorials and advice. You can read my articles here: https://virtuooza.com/author/akira/

Werk.se, Stockholm, Sweden — Remote Frontend Developer

2010 - 2014

Worked remotely. Coded designs into functional, responsive themes for e17 CMS and Wordpress CMS. Created custom plugins for Wordpress and implemented new features to already running web sites. Worked with a team of designers and content creators to meet all customer demands.

Sudo Host Inc, Ontario, Canada — Remote Frontend Developer

2008 - 2011

Website design and development, graphic design. Provided help to web hosting customers, built custom solutions for customer needs.

Akirapowered.com — Frontend Developer

2005 - 2012

Personal website project offering free and premium Wordpress and e107CMS themes and plugins. This project helped me grow as developer, acquire new skills and meet many great friends from all over the world.

EDUCATION

Faculty of Philosophy, Sarajevo — *Master of bosnian language and literature*

2004 - 2010

Lorem ipsum dolor sit amet, consectetuer adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore.
